Miss MOLECULE & friends

EPISODE 2

Methane

Book a visit to your school from an industry expert!

Miss Molecule & Friends © Studio Wallop

Exciting Free resources for KS2 & 3 to learn about methane

Methane is a powerful gas that can trap heat in our atmosphere, and right now, there's more of it than ever! Human activities, like farming and industry, are adding to the problem. But don't worry – solutions are on the way! Local companies are getting creative, like turning cow poo into clean energy and using satellites to spot methane leaks around the world!

You can learn all about these exciting ideas and more with our FREE resources! Plus, you can book a FREE expert visit to your school to dive deeper into the world of methane and climate action.
